- SPRAY ON TANNING -

DAY OF APPOINTMENT

****NO LOTION,/CREAMS, MAKEUP OR DEODORANT THE DAY OF AS THEY COULD BLOCK DEVELOPMENT.**

****WHATEVER YOU WEAR WILL CREATE TAN LINES. WEAR SOMETHING OLD OR DARK, AS IT MAY STAIN. MOST INDIVIDUALS GO TOP-LESS,BUT IT IS WHATEVER YOU ARE COMFORTABLE WITH.**

****IT WILL TAKE APPROX 15 MIN FOR APPT**

****WEAR LOOSE CLOTHING. TIGHT CLOTHING SQUEEZES PRODUCT OUT OF CELLS AND CAN CREATE LINES OR DISCOLORATION. ****NO SHOWERS, SEX OR BATHING FOR AT LEAST 8 HOURS. IMMERSION IN WATER CAN WASH OFF THE TAN AND SWEATING CAN CAUSE DISCOLORATION OF THE TAN.****

****MAINTENANCE—TO MAINTIAN A NICE LOOKING TAN, RESPRAY APPROXIMATELY ONCE A WEEK. THE LONGEVITY OF YOUR TAN WILL DEPEND ON YOUR SKIN AND HOW WELL YOU MOISTURIZE IT!!**

****MOISTURIZER IS A MUST IF YOU WANT TO EXTEND THE LIFE OF YOUR TAN. APPLY IN MORNING AND EVENING FOR BEST RESULTS TO EXTEND THE LIFE OF YOUR TAN.**

THE PROCESS: THE TANNING PROCESS USES AND INGREDIANT CALLED DHA (DIHYDROXYACETONE) TO REACT WITH THE SKINS AMINO ACID. THE PROCESS RESULTS IN A GOLDEN APPEARANCE.

RESULTS: You can't force a tan on your skin with the sun and you should not try to with DHA either. The darker you tanning normally, the darker you can tan with Sun Kissed tanning process.

TAN LASTS depending on your skin and how you treat it following the process. The range of time is from 5 to 8 days depending on how you take care of the skin. MOISTURIZING twice daily to extend the life of your tan. Avoid long hot bathes, hot tubs, and swimming pools as this exfoliates the skin faster resulting in shorter life of your tan.

CHALLENGES: Following each session avoid perspiring, exercising and bathing for at least 6-8 hours. Avoid tight binding clothing as this will discolor the skin. Avoid wearing or sitting on leather as it will stain.

SIDE EFFECTS: Most all tanners main ingredient is DHA. If you have used self tanners and have had an allergic reaction to them, it is possible you could with this process also. Some people have broken out with the DHA in a short lived rash. If you are currently taking Retin A or hydrocortisone, you should not tan until you have stopped using the products. If you have a sunburn, skin rash, skin injury or if you are peeling, it is recommended not to tan until after your skin is healed.

NO SUNSCREEN: There is no sunscreen in our products. Even though you will have a golden bronze color, you must approach the sun or tanning beds as though you are completely pale.

MAINTENANCE AFTER: You may notice some color washing off— it is merely the excess. It's normal and will still leave you with a deep tan. **REMEMBER TO MOISTURIZE TWICE DAILY TO KEEP YOUR TAN LONGER!!!**
